

Timothy Lotze M.D. is a tenured Professor of Pediatrics and Child Neurology at Baylor College of Medicine and Texas Children's Hospital. He is originally from Sugar Land, TX, which is a suburb of Houston. He received a degree in Physics from Texas A&M University and subsequently attended medical school at the University of Texas Health Science Center in San Antonio. Upon graduation, he trained in General Pediatrics at Ohio State University and served as the Chief Resident after completing his categorical training in 1999. He then returned to Houston to train in Child Neurology at Baylor College of Medicine. He completed this training in 2002 and has been part of Baylor faculty ever since.

Dr. Lotze established the Neuroimmunology services at Texas Children's Hospital in 2004 with the development of a pediatric multiple sclerosis clinic that subsequently evolved to cover a large number of neuroimmune disorders to include OMA. A fellowship program in Neuroimmunology was established in 2018, which has included training in the diagnosis and management of patients with OMA. As a primary referral center for patients with OMA, Dr. Lotze and other team members are actively engaged in related collaborative research, to include the POOMAS registry.

Dr. Lotze currently serves as the director for the neuromuscular services at Texas Children's Hospital and has a number of ongoing clinical trials related to treatments and outcomes for patients with these conditions.

Dr. Lotze has served as the Baylor College of Medicine Child Neurology Residency Program Director since 2005 and also currently serves as the Chair for the American Academy of Pediatrics Section of Neurology.
